

2021 MEDICAL STAFF DIRECTORY

A network of medical professionals dedicated to your health.

Bayhealth is a not-for-profit healthcare system, and the largest in central and southern Delaware. It is comprised of Bayhealth Hospital, Kent Campus in Dover; Bayhealth Hospital, Sussex Campus in Milford; an Emergency Center in Smyrna; and numerous satellite facilities and physician practices. Since 1927, we've been fulfilling our mission to strengthen the health of our community, one life at a time. Our medical staff covers primary care and many specialties, providing a wide network to meet the needs of you and your family. We continue to recruit top medical talent to our region to deliver comprehensive and high-quality healthcare through a compassionate, person-centered patient experience.

For the most up to date listing of our medical staff, visit Bayhealth.org/Find-A-Doctor or call 1-866-BAY-DOCS (229-3627).

Find a provider that's right for you

Whether you recently changed health insurance plans, are new to the area, or need a specialist, Bayhealth is here to help. Through BayDocs, our free referral and information line available 24 hours a day, 7 days a week, and our Find-A-Doc online search tool, we offer access to a diverse group of healthcare professionals, including more than 400 physicians, as well as advanced practice clinicians such as physician assistants and nurse practitioners. For your one-stop connection to all Bayhealth providers, visit Bayhealth.org/Find-A-Doctor or call 1-866-BAY-DOCS (229-3627).

New providers are continuously added to our medical staff throughout the year. This directory reflects those providers with whom patients can schedule office appointments. Providers may have additional locations than what is listed on the following pages. Hospitalists and doctors in emergency medicine, pathology and laboratory medicine, and other departments that practice hospital-based medicine can be found online. Please visit Bayhealth.org to view the most up-to-date physician listing and to learn more about all the services we offer.

The pages in this directory list active Bayhealth medical staff as of March 31, 2021 entitled to admit patients to the hospital(s), manage patients' treatment, order and interpret diagnostic tests, and perform procedures as required and granted in their delineation of Clinical Privileges.

Physicians marked with this icon have bio videos online. Search by name for their physician page through Bayhealth.org/Find-A-Doctor to view.

Medical Staff Listing by Specialty

Allergy

Allergists are doctors who specialize in the diagnosis, treatment and management of asthma and allergies.

Shankar L. Lakhani, MD
Family Allergy & Asthma Care
200 Banning Street, Suite 280
Dover, DE 19904
(302) 734-4434

Joel R. Temple, MD
9 East Loockerman Street, Suite 303
Dover, DE 19904
(302) 678-1343

Cancer Care

Specialists in cancer care, commonly called oncologists, are specially trained in the medical treatment of cancer. Medical oncologists diagnose and treat cancers requiring chemotherapy, and provide patient care and monitoring of chemotherapy treatment. Radiation oncologists use high-level energy beams (radiation) to destroy the ability of cancerous cells to produce. They oversee the care of patients receiving radiation treatment.

Cardiology

Cardiology is the medical specialty that deals with abnormalities or diseases of the heart and the circulatory system. Electrophysiologists specialize in diagnosing and treating heart rhythm disorders. Interventional cardiologists deal specifically with treatment of cardiovascular disease or heart defects through catheter-based procedures. Cardiothoracic and vascular surgeons are listed in the Surgery section.

Obstetrics/Gynecology (OB-GYN)

An obstetrician-gynecologist, or OB-GYN, is specially trained in female reproductive health, pregnancy, and childbirth. Gynecology deals with the functions and diseases specific to women and girls, especially those affecting the reproductive system, and obstetrics focuses specifically on childbirth and the care of women giving birth. Maternal-fetal medicine physicians treat mothers-to-be, from pre-conception through the birthing process, and have expertise in high-risk pregnancies.

Primary Care

Primary care, sometimes called family or general, practitioners provide continuous, comprehensive care for family members of all ages. Typically they are the first contact, providing preventative healthcare and treating common illnesses, and they help integrate other specialist care that a patient may need.

Surgery

Surgeons perform surgical operations for a wide variety of conditions, and are responsible for patient care before, during, and after surgery. General surgeons perform routine or complex operations on major organs and bodily systems and for various purposes, such as bariatric or weight loss surgery. Some surgeons have a subspecialty with a more narrow focus on surgical care for a particular area of the body. Cardiothoracic surgeons specialize in surgeries of the heart, lungs and other organs in the chest, and vascular surgeons operate on the blood vessels. Colorectal surgeons specialize in surgical treatment of conditions that affect the lower digestive tract, including the colon, rectum and anus.
